Company Profile

Corporate Presentaion

About Us

Vintron Informatics Limited is a public listed company headquartered in New Delhi, India. It is a leading manufacturer of electronic security and surveillance products in India. Founded in 1991, Vintron commenced its operations by manufacturing of Desktop PC, Motherboards & Monitors. Subsequently, Vintron expanded its operation to various sub-segments of electronics. Vintron has a pedigree of 30 years of successfully serving the Indian customers with innovation, responsiveness and trust.

Vintron is registered in the Indian Government's "Make in India" programme & all the products sold by Vintron are indigenously manufactured in our state-of-art manufacturing facility located at Okhla, New Delhi.

In a market majorly flooded with cheap Chinese electronic products, Vintron has made a strong standing of its own, as being a reliable & truly Indian made brand. Vintron products pass stringent quality control tests and carry international certifications such as CE, FCC, ROHS, etc.

Apart from strong manufacturing capabilities, Vintron has pan-India presence in the form of dedicated channel & offers extensive range of electronic security and surveillance products ranging from Analog cameras, high definition IP camera and speed domes to DVRs, NVRs, Mobile DVRs, POE Switches, Smart home automation cameras and more.

VOCAL FOR LOCAL

State-of-Art

Vintron's State of the Art Manufacturing Facility at Delhi

Vintron's manufacturing facility is registered under the Prime Minister's "Make in India" initiative which encourages businesses to manufacture indigenously. The facility is equipped with world class technology and latest state of the art machines. The facility also has its own dedicated R&D and Testing Center, to facilitate product development and ensure stringent quality standards.

With over 100 experienced Engineers and Technicians employed at the facility, the facility currently has a capacity to make 60,000-70,000 security cameras per month.

Since the manufacturing is done indigenously the product range and models can be diverse and modified as and when required to match customer's requirements.
